Federal Tax Federal Tax Credits for Consumer Energy Efficiency Products

Set to expire December 31st, 2010

The American Recovery and Reinvestment Act of 2009 encourages investing in energy infrastructure, and increasing the energy efficiency and performance of America's homes and commercial buildings.

Specifically, for heating and cooling products, the new law makes important changes to existing tax incentives for homeowners who make qualified improvements of higher efficiency HVAC and water heating equipment to their primary residences.

For qualified improvements homeowners may be able to claim tax credits up to \$500.
